

BEANBASE

The stage for your favorite Fatboy beanbag

The Fatboy Original has been a home hero for years. Unconventional, generous, and super comfy. Fatboy loves reinventing its classics in surprising ways, without losing what made them iconic. That's exactly why the Beanbase was created. This clever design frame lifts your Fatboy Original or Original Slim beanbag to the next level.

Literally, because this metal base creates the perfect stage for your favorite beanbag. The result? A lounge chair with the look of a design classic, the comfort of a beanbag, and the support you didn't know you were missing. Looking for a fresh take on your favorite Original beanbag? The Beanbase gives a design-forward twist to a true classic, and gives it a prominent spot in your home.

Slim frame, solid foundation

The Beanbase looks refined, feels comfy, and stands its ground. How? Its frame is made of powder-coated steel and weighs 9 kilos: sturdy, but far from bulky. It comes flat-packed in five parts, and with just six screws and the included tool, you'll have it set up in no time. Over the frame goes a strong polyester cloth, kept nice and taut thanks to a combination of flexible fiberglass rods and an elastic cord. Every color comes tone-on-tone: the frame and seat always match, finished with contrasting piping and stitching for that extra touch. Felt gliders on the bottom keep your floor scratch-free. And that iconic red Fatboy label on the canvas? That's the finishing touch. All in all, the Beanbase gives your Original beanbag an effortless, refined twist.

Comfort meets character

The Beanbase is made for indoor lounging. Perfect for your living room, reading nook, or home office.

Pair it with your Original or Original Slim beanbag and enjoy the perfect mix of comfort, support and... design with a smile. Just drop your beanbag on the frame, shape it a bit, and sink right in. Ready for a change of scenery? No big deal. The Beanbase is light enough to follow you wherever you feel like lounging.
